📇 PROFILE

I am an experienced software engineer with a Bachelor's degree and over 3+ years of experience in the field. My expertise lies in JavaScript, React, and Angular. I have a proven track record of delivering scalable and robust applications by following industry best practices. I have designed and developed web and mobile applications ranging from small to enterprise-level projects. I am a strong believer in continuous learning and staying up-to-date with the latest advancements in technology. I enjoy working in a team environment and contributing my expertise. Additionally, I have a passion for traveling and exploring different cultures.

Foundation University Islamabad

💼 PROFESSIONAL EXPERIENCE

11/2023 – present
Islamabad, Pakistan

Systems Ltd
Angular Consultant
- Integrate APIs seamlessly into Angular and ReactJS applications.
- Performing analysis of product development.
- Optimize web applications for performance and enhance website speed.
- Utilize various techniques to ensure responsiveness and efficiency
- Building dynamic and adaptable web applications.
- Commit to delivering high-quality solutions meeting client requirements and industry standards.

10/2022 – 10/2023
Islamabad, Pakistan

SAUFIK
Frontend Developer (Angular)
- Proficiently transform intricate UI/UX designs into dynamic, responsive front-end solutions utilizing HTML, CSS, JavaScript, Angular, and ReactJS.
- Successfully contribute to a portfolio of 4 diverse projects, each encompassing unique categories, and functionalities.
- Played an instrumental role in creating intuitive and engaging online learning web applications, elevating user experience and knowledge dissemination.
- Solely executed a SharePoint project, showcasing a high level of technical proficiency and problem-solving acumen.
- Collaborate seamlessly with cross-functional UX/UI teams to ensure pixel-perfect translation of designs into functional interfaces.
- Contribute actively to code reviews and debugging sessions, aligning codebase with best practices and maintainability standards.

01/2022 – 09/2022
Islamabad, Pakistan

UtoR Solutions
Frontend Developer (Angular)
- Proficiently transformed intricate Figma and XD designs into dynamic web applications utilizing HTML, CSS, JavaScript, and the Angular framework.
- Led the successful execution of 3 major projects, each presenting unique challenges and objectives.
- Engineered an innovative online art marketplace, integrating a distinctive demo wall feature. This allowed users to visualize art pieces within their living spaces before purchasing, enhancing the buying experience.

- Designed and implemented a comprehensive dashboard for a multi-branch restaurant project spanning various regions and countries. The dashboard efficiently collated and presented branch data, optimizing decision-making processes.
- Collaborated closely with UX/UI teams, ensuring seamless alignment between designs and realized interfaces for superior user experiences.
- Actively contributed to code reviews, upholding coding standards, best practices, and robust development methodologies.

01/2020 – 11/2021
Rawalpindi, Pakistan

Orcalo Holdings
Web Developer
- Developed user-facing features using React.js, Angular, Bootstrap, and CSS
- Optimized components for maximum performance across various devices and browsers
- Incorporated new features into existing source code, ensuring bug-free implementation
- Managed website development projects from design to completion with cross-browser compatibility
- Developed websites from frontend to backend using Core PHP, Codeigniter, JavaScript, jQuery, HTML/CSS
- Designed and maintained corporate and client websites with scripting languages and CMS like WordPress
- Implemented enhancements to improve web functionality and responsiveness.

📁 PROJECTS

ReidHealth
I created a custom design for a SharePoint site using ReactJS, making it look better. One of the standout features I added was an advanced ordering system to make it easier to prioritize content. I also added a chatbot using Microsoft Power Automate for real-time notifications and to automate repetitive tasks. I worked with different teams to make sure the project matched our goals and branding. This project shows that I'm skilled in customizing SharePoint, using ReactJS, and integrating chatbots, and I'm good at improving the user experience and making processes more efficient. My skills include SharePoint Framework (SPFx), ReactJS, Power Virtual Agent, Microsoft Power Automate, UX Design, and Front-End Development.
